

Press Release

Ubiquiti announces digital eSIM availability on iPhone

Paris, France, December 17th, 2019

Ubiquiti is announcing digital eSIM available on iPhone. Users can now activate an additional cellular plan on iPhone 11 and iPhone 11 Pro models, iPhone XS models and iPhone XR, as well as for iPad with eSIM, making it easy to use two different data plans on one device. Ubiquiti offers high-end global cellular connectivity and eSIM services in over 150 destinations, with a large range of affordable prepaid data plans.

About Ubiquiti

Ubiquiti is Transatel's new customer-facing brand for worldwide cellular connectivity dedicated to the Internet of Things. The service offers "always connected" wireless capabilities to smartphones, laptops, tablets, and automobiles, at near-to-local rates in over 150 countries and destinations.

About Transatel

Now a member company of NTT Group, one of the largest telecom companies in the world, Transatel offers an unparalleled, eSIM-capable, cellular solution for global and secure IoT connectivity. Since its inception in 2000, the company has launched over 170 MVNOs (Mobile Virtual Network Operators), establishing Transatel as the leading European MVNE/A (Mobile Virtual Network Enabler/Aggregator). Having acquired expertise in Machine-to-Machine connectivity, the company easily transitioned into the Internet of Things, where it now addresses the three market segments of automotive, laptops and tablets, and the industrial IoT.
